Conference calls web conferences presentations

Conference and train safely

Without investments, easy to use

Easy to use

International dial-in-numbers

No installations

Why central-meeting?

A great deal of time and high costs - these are factors which play a key role in organizing meetings.

With conference call and web conferences of GTC central meeting you reach customers and business partners in a short term and very cost-effective. No matter where you are - all you need is a touch-tone phone or an Internet connection for web conferences!

A simple phone enables every dialogue partner to dial into any conference, no matter the network he is calling from. You **don't need any additional equipment**, which means no extra investment, in order to take part in a conference. Use your time better and start your web conference when you like - **without monthly** fixed costs.

central-meeting

Conference Call – so easy

Depending on the way you want to connect all participants you can chose between a dial-in or a dial-out-conference – or mix both of them.

Dial-In conference

+ All participants dial in **by phone** at the desired time – **certainly** password protected

+ World-wide in-dailing numbers (e. g. in Great-Britain, USA, Germany, France and many other countries

+ Recording function and many other features

Dial-Out conference

+ All participants will be **informed about the conference by e-mail** - free of charge

+ At the desired time, all participants will be **called automatically by the system**

+ After a **successful connection** the moderator will be connected to all the participants

Your benefits

+ Trilingual menu navigation in German, English and French

+ Possibility to operate the conferences simultaneously online

+ Highest security standard by conference servers located in Germany

+ International dial-in numbers

+ Flexible calculation models

+ Web conferences in support of your conference call

Web Conferences – so easy

✛ Show your **individual applications** you are using on your computer to all participants – or just a part of them

✛ For assisting your participants in technical problems, ask them to gain access to their PC – so you can help them directly (participant confirmation required)

✛ Run a **video conference** and show your participant everything live with your webcam

✛ Benefit from **additional features**, like chat-functions or the whiteboard-function

Your features

✛ **Audio-Streaming:** Your participants hear the sound of your conference directly on their computer- without a telephone

✛ **Whiteboard-function:** Design ideas with your participants: develop graphic elements or work on existing files - there´s no limit to your ideas

✛ **Live-Chat** with one or more participants

✛ **Videoconferencing** - Up to 8 participants can show on their webcam

✛ Overview of important **conference details** e.g. switched-participants

✛ **Parallel work** on files - upload files for participants and work on them together

✛ **Download of** hosted files

✛ **Video recording** of your conference, saving the whiteboard results as a file, …

Just want to present?

You want a presentation as easy as possible? Optionally you can use a simple web presentation. We describe this in the following.

Web presentation – so easy

You can present your ideas to your participants with a web presentation – as a pure presentation. The participants follow you directly on the computer – system independent via internet.

Your features

✚ **Audio-Streaming:** Your participants hear the sound of your conference directly on their computer -
   without a telephone

✚ Or choose an **additional conference call** – then participants listen you by phone.

✚ **Live-Chat** with one or more participants

✚ **Video recording** of your presentation

✚ **Control over the web presentation** (e.g. block for new participants, list of all participants)

Your benefits

✚ **Easy to handle** – Upload PDF or Power Point files and start it subsequently

✚ **Without installations and without downloading an extra file**

Ideal for product presentations, strategic planning etc.

The range of functions is smaller than with web conferences. Because of the limited options, the handling is easier and self-explanatory.

In contrast to web conferences, participants do not need to download a file. Therefore, the handling is also much easier for your participants.
